Legal Information & Disclaimers

This page supplements the general BootyNet disclaimer with information specific to BootyNet Green. It does not replace it.

Nature of This Page

BootyNet Green is a satirical sustainability initiative. BootyNet does not use, generate, purchase, or offset energy of any kind, because BootyNet does not have any real infrastructure that could use, generate, purchase, or offset it. Every figure, percentage, and rating on this site is invented for entertainment purposes.

Power & Energy Figures

There is no power draw, because there is nothing drawing power. Any numbers on this site describing energy use, generation, or renewable mix are made up and do not correspond to anything real.

Sustainability Rating

There is no sustainability to rate. The rating shown on this site is a number BootyNet made up.

Reports

Any sustainability report referenced or made available for download on this site is a fictional document, written for entertainment purposes, and does not describe anything real.

For all other BootyNet disclaimers, including the general nature of BootyNet's services, data collection practices, and contact details, see the [main BootyNet disclaimer](#).
